Vivek Kumar

System Administrator

PROFILE

This highly experienced system administrator with four-year with Microsoft Windows networking support, my goal is to utilize my technical skills and obtain a system administrator position at a Texas-based company. Highly experienced in LAN, WAN, Internets and communications systems, network security and network equipment, Windows Server 2003, 2008 and 2012 platforms, MS Power Shell scripting, SCCM

OBJECTIVE

A system administrator is an IT administration practitioner responsible for the construction, development and maintenance of computer networks and systems. Many types and levels of system administrators are available, but they all work in maintaining computer systems, upgrading servers, securing server data and programming for a company's day-to-day operations.

Achievement

- Best overall performance Award in 2019 - 2020
- Customer Delight Award in 2020-2021
